

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended): Thread carrying apparatus for a weaving machine at which a thread (2) lies in contact or passes along with friction in the operating state, with the thread carrying apparatus including excitation means (3) for producing oscillations which reduce the frictional force between the thread (2) and the thread carrying apparatus, ~~characterized in that~~ including a resonator body (4) ~~is provided~~ at which the thread (2) lies in contact or passes along with friction in the operating state, with the resonator body (4) being designed in such a manner that the excitation means (3) produce resonant structural sound oscillations in the resonator body (4).

2. (withdrawn): Thread carrying apparatus in accordance with claim 1, in which at least one excitation means (3) is designed as an electromagnetically excitable oscillating element (41).

3. (withdrawn): Thread carrying apparatus in accordance with claim 1 or claim 2, in which at least one excitation means (3) is designed as a piezoelectric oscillating element (42).

4. (withdrawn): Thread carrying apparatus in accordance with any one of the preceding claims, in which at least one excitation means (3) is designed as a magnetostrictive oscillating element (43).

5. (withdrawn): Thread carrying apparatus in accordance with any one of the preceding claims, in which at least one excitation means (3) is designed as a mechanically excited oscillating element (44).

6. (currently amended): Thread carrying apparatus in accordance with claim 1, in which the resonator body (4) comprises an electromagnetically excitable oscillating element (41) in which the electromagnetic energy for the excitation of at least one oscillating element (4) can be coupled in ~~in~~ a wireless manner by means of a transmission device (T).

7. (currently amended): Thread carrying apparatus in accordance with claim 1, in which the resonator body (4) is formed by ~~the~~ a thread drum (51) of a drum store (5) of ~~a textile machine, in particular of a~~ the weaving machine.

8. (currently amended): Thread carrying apparatus in accordance with claim 1, in which the resonator body (4) is formed by a thread guiding element (61) of a weaving rotor (6) of a ~~multiple-phase~~ multiple-phase weaving machine.

9. (currently amended): Thread carrying apparatus in accordance with claim 1, in which the resonator body (4) is formed by a thread deflection apparatus (7), ~~in particular by a thread deflection apparatus (7) of a textile machine~~ of the weaving machine.

10. (currently amended): ~~Textile machine, in particular a~~ A weaving machine, including a thread carrying apparatus in accordance with claim 1.
